Art Unit 2818

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or suggest circuits and methods for reducing unnecessary changes to outputs of latch circuits. In particular, a method comprises: receiving an input signal by a latch circuit in conjunction with a command; determining if the command is an invalid command; and latching the first input signal with the latch circuit only if it is determined the command is not invalid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakayama, Tomohiro et al. (U.S. Patent 5600599), Watanabe, Jun (U.S. Patent 6137744), Tomita, Hiroyoshi et al. (U.S. Patent 6307806) and Okuyama, Yoshiaki et al. (U.S. Patent 6477093) disclose latch control circuits for synchronizing operations in memory integrated circuits.
